# ABOUT US

---

The NOTES Platform - which is an abbreviation of 'NimkarTek Online Training in Environment and Sustainability', is an E-Learning platform developed and managed by experts at NimkarTek.

Established in 2012, NOTES offers accessible, economical, and interactive courses on areas such of Chemical Management and other Sustainability Related Topics for the Textile, Apparel, Footwear and Leather industry.

*On Demand Training  
that helps fast-track  
your Sustainability Goals*

## ACCREDITATIONS

**ZDHC ACCREDITED  
TRAINING PROVIDER (ATP)**

NOTES is the approved  
E-learning Training  
Provider for the *ZDHC  
Academy*

**CASCALE APPROVED HIGG  
FEM TRAINER BODY**

NOTES is approved by  
the Cascale to provide  
E-Learning Courses on  
the *Higg Facility  
Environmental Module  
(FEM)*

# NOTES 2.0

With an upgraded system, revamped content & amended prices

## TRAINING FEATURES

Expert Trainings on Technical topics

Economical and budget friendly

Bite size information at your fingertips

Dedicated Helpdesk

Interactive and Engaging Content

Trainings in multiple Languages

Resource library for additional information

Assessments and Certifications

Tailor made trainings for your teams

Track learner progress through reporting

A Learning Environment - for the Environment

# CUSTOMIZED TRAININGS

## Custom Creation

---

We understand the importance of infusing your organisation's strategy and goals with expert knowledge.

## Dedicated Support

---

Collaborate with our teams to create a training program, and get access to live progress reports from the Group Dashboard feature on NOTES

## Pricing for your needs

---

We offer a variety of packages, and work with you to create a course best suited for your budget.

---

# CONTINUAL IMPROVEMENT

Developed by the very best Industry experts, our training courses are developed keeping in mind the evolving nature of chemicals management, environment and sustainability topics.

Our belief in the philosophy of 'Change is the only constant' drives us to continually update our training courses to provide the latest and most up-to-date content to our learners.

# OUR COURSES

01

ZDHC Courses

02

Higg FEM Courses

03

Off the Shelf Courses

04

Product Stewardship

We have On-Demand Courses for the Textile, Apparel, Leather and Footwear Supply Chain

# ZDHC Courses

NimkarTek is a ZDHC Accredited Training Provider (ATP).

Nimkartek offers ZDHC approved training content through the NOTES platform, enabling learners to learn in an environment most comfortable to them.

## Benefits

Understand and use ZDHC Tools and Guidelines

Obtain Competitive Advantage

Understanding of leading Industry standards

ZDHC Academy Certificate

- ZDHC CMS TIG Training 
- ZDHC CMS TIG Refresher Training
- CMS TIG Training for Denim Wet Processing 
- CMS TIG Training for Leather Industries 
- Basic Wastewater Management Training (V2.2)
- Advanced Wastewater Management Training (V2.2)
- Top 10 Best Practices in Chemical Management
- CMS Framework for Brands and Retailers
- CMS Framework for Suppliers

## ACADEMY

By ZDHC

*These trainings are available in English and Chinese*

# Higg FEM V4.0 Courses

NimkarTek's Training Program on Higg FEM provides individuals and organizations proper training and expert insight in understanding and implementing the **Higg FEM – Version 4.0**.

The Training offers practical guidance that will help Facilities with its implementation. The trainings are developed for the Industry with a view to help facilities improve their performance and achieve good scores.

We offer trainings on Higg FEM Level 1, Level 2, Level 3

- » Site Info and Permits
- » EMS
- » Energy and GHG
- » Water Use
- » Wastewater
- » Air Emissions
- » Waste
- » Chemical Management

## Topics Covered

-  Intent of the question
-  Technical guidance
-  Documents to be uploaded within each Question

# Courses on Restricted Substances

RSLs are documents that list out substances which are restricted for use in the Textile and Leather supply chain.

It is important that all stakeholders of the Supply chain understand and comply with the criteria specified in these documents.

NimkarTek's training courses on Restricted Substances provide you with information on major restricted chemical groups, their sources in Industry and suitable alternatives. The trainings will support you in developing and implementing a robust compliance strategy.

- » Restricted Substances in Textiles (RSLs and MRSLs)
- » Testing Requirements for RSL Compliance
- » Implementing Best Practices for RSL Compliance

## Course Features

-  Course duration: 60-75 Minutes
-  Assessment at the end of the training
-  Certificate of Achievement

Create a customised training for your teams by infusing your company RSL within these training courses.

# Courses on Individual Restricted Chemical Groups

These trainings focus on some major restricted chemical groups such as APEOs, PFCs, Banned Amines and Phthalates.

All of these training topics cover the basic chemistry, the various health and environmental concerns associated with each restricted substance, and their use in the textile and leather industry.

The training courses discuss various available alternatives and elimination strategies for each of these groups.

- » Understanding APEOs
- » Properties and Usage of APEOs
- » Fundamentals of PFCs
- » Understanding Banned Amines
- » Fundamentals of Phthalates

## Add Ons

Case Studies

Onboarding and Q&A Webinars

# Courses on Chemical Management

The system of managing chemicals for consumer, worker and environmental protection is called a Chemical Management System (CMS).

These trainings will help you enhance your chemical management performance, thereby reducing risks to your organisation, customers, workers and the environment.

Each course provides practical guidelines, and will help you implement a robust system to manage chemicals and their hazards.

- » Understanding Safety Data Sheets
- » Chemical Management Systems for Compliance
- » Chemical Safety at the Workplace 
- » Chemical Storage
- » Setting up a Chemical Inventory List
- » Chemical Management: Assessments
- » Fundamentals of Wastewater Management
- » Chemical Management: Process Control
- » Chemical Management: Continuous Improvement

# Courses on General Topics

These courses cover general chemical and sustainability topics in the textile and leather industry.

Suitable for all stakeholders in the supply chain, the information in these courses helps brush up on your understanding of some foundational topics.

- Auditing Skills
- Basics of Eco Terms and Concepts
- Basics of Textile Fibers and Coloration
- Business Case for Chemical Compliance
- Global Legislations on Chemicals for Textiles

# Courses on Product Stewardship

Product stewardship is the act of minimizing the environmental, and social impacts of a product and its packaging throughout all lifecycle stages, while also maximizing economic benefits.

Topics covered include each hazard type under the GHS, relevant Legislations and Initiatives, Transporting Dangerous Goods, and more.

- Introduction to Product Stewardship
- Understanding Globally Harmonized System (GHS)
- Fundamentals of GHS Safety Data Sheet
- Physical Hazards (GHS)
- Health Hazards (GHS)
- Environmental Hazards (GHS)
- UN Transport of Dangerous Goods
- EU REACH Regulations
- Chemical Management Legislations and Inventories
- Industry Initiatives for Chemical Management.

The comprehensive 'Product Stewardship Training Program' includes all the courses under one package

**Audiences:**  
Chemical Manufacturers, Suppliers and Formulators.
