in Environment and
Sustainability**

BROCHURE

ABOUT US

The NOTES Platform - which is an abbreviation of 'NimkarTek Online Training in Environment and Sustainability', is an E-Learning platform developed and managed by experts at NimkarTek.

Established in 2012, NOTES offers accessible, economical, and interactive courses on areas such of Chemical Management and other Sustainability Related Topics for the Textile, Apparel, Footwear and Leather industry.

*On Demand Training
that helps fast-track your
Sustainability Goals*

ACCREDITATIONS

ZDHC ACCREDITED
TRAINING PROVIDER (ATP)

NOTES is the first approved
E-learning Training Provider
for the *ZDHC Academy*

SAC APPROVED HIGG
FEM TRAINER BODY

NOTES is approved by the
Sustainable Apparel Coalition
to provide E-Learning
Courses on the *Higg Facility
Environmental Module (FEM)*

Online Training for
the Apparel,
Footwear and
Chemical Supply Chain

Training Features

Expert Trainings on
Technical topics

Economical and budget
friendly

Bite size information at
your fingertips

Dedicated Helpdesk

Interactive and
Engaging Content

Trainings in multiple
Languages

Resource library for
additional information

Assessments and
Certifications

Tailor made trainings for
your teams

Track learner progress
through reporting

A Learning Environment for the Environment

CUSTOMIZED TRAININGS

Custom Creation

We understand the importance of infusing your organisation's strategy and goals with expert knowledge.

Dedicated Support

Collaborate with our admin team to create a training program and work with our help desk for timely progress reports

Pricing for your needs

We offer a variety of packages, and work with you to create a course best suited for your budget.

CONTINUAL IMPROVEMENT

Our belief in the philosophy of 'change is the only constant' drives us to continually use feedback to improve our services.

Our training courses are developed keeping in mind the evolving nature of chemical management and sustainability topics.

OUR COURSES

01 Off the Shelf Courses

02 ZDHC Courses

03 Higg FEM Courses

04 Product Stewardship

We have On Demand Courses for the Textile, Apparel, Leather and Footwear Supply Chain

Courses on Restricted Substances

- Restricted Substances in Textiles (RSLs and MRSLs)
- Testing Requirements for RSL Compliance
- Implementing Best Practices for RSL Compliance

Course Features

-  Course duration: 60-75 Minutes
-  Assessment at the end of the training
-  Certificate of Achievement

RSLs are documents that list out the substances which are restricted for use in the textile and leather supply chain.

Every tier of the supply chain needs to understand and comply with the criteria specified in these documents.

These training courses provide you with information on major restricted chemical groups, RSLs and MRSLs, and will help you create a compliance strategy.

Infuse your Company RSL within these off the shelf training courses to create a bespoke learning environment for your teams

Courses on Individual Restricted Chemical Groups

- Understanding APEOs
- Properties and Usage of APEOs
- Fundamentals of PFCs
- Understanding Banned Amines
- Fundamentals of Phthalates

Add Ons

-  Case Studies
-  Onboarding and Q&A Webinars

These trainings focus on some major restricted chemical groups such as APEOs, PFCs, Banned Amines and Phthalates.

All of these training topics cover the basic chemistry, the various health and environmental concerns associated with each restricted substance, and their use in the textile and leather industry.

The training courses discuss various available alternatives and elimination strategies for each of these groups.

Courses on Chemical Management

- Understanding Safety Data Sheets
- Chemical Management Systems for Compliance
- Chemical Safety at the workplace 
- Chemical Storage
- Setting up a Chemical Inventory List
- Chemical Management: Assessments
- Fundamentals of Wastewater Management
- Chemical Management: Process Control
- Chemical Management: Continuous Improvement

The system of managing chemicals for consumer, worker and environmental protection is called a **Chemical Management System (CMS)**.

These trainings will help you enhance your chemical management performance, thereby reducing risks to your organisation, customers, workers and the environment.

Each course provides practical guidelines, and will help you implement a robust system to manage chemicals and their hazards.

Courses on General Topics

- Auditing Skills
- Basics of Eco Terms and Concepts
- Basics of Textile Fibers and Coloration
- Business Case for Chemical Compliance
- Global Legislations on Chemicals for Textiles

These courses cover general chemical and sustainability topics in the textile and leather industry.

Suitable for all stakeholders in the supply chain, the information in these courses helps brush up on your understanding of some foundational topics.

Courses on Product Stewardship

- Understanding Globally Harmonized System (GHS)
- Fundamentals of GHS Safety Data Sheet
- Physical Hazards (GHS)
- Health Hazards (GHS)
- Environmental Hazards (GHS)
- UN Transport of Dangerous Goods
- EU REACH Regulations

Product stewardship is the act of minimizing the environmental, and social impacts of a product and its packaging throughout all lifecycle stages, while also maximizing economic benefits.

These courses are especially beneficial to stakeholders of the **chemical industry** such as **chemical suppliers, formulators, manufacturers and traders.**

Topics covered include each hazard type under the GHS, relevant Legislations and Initiatives, Transporting Dangerous Goods, and more.

The comprehensive 'Product Stewardship Training Program' includes all the courses under one package

ZDHC Courses

- CMS Technical Industry Guide (TIG) Training 
- CMS TIG Training for Denim Wet Processing
- Wastewater Management Training (V2.1) 
- Top 10 Best Practices
- CMS Framework for Brands and Retailers
- CMS Framework for Suppliers

 These trainings are available in English and Chinese

NOTES is a **ZDHC Approved Training Provider (ATP)**.

ZDHC Approved content is delivered through the NOTES Platform, enabling learners to learn in an environment most comfortable to them.

Benefits

- 01** Understand and use ZDHC Tools and Guidelines
- 02** Obtain Competitive Advantage
- 03** Understanding of leading Industry standards
- 04** ZDHC Academy Certificate 

ACADEMY

By Ø ZDHC

Higg FEM Courses

The Higg Facility Environmental Module (FEM) measures environmental performance of facilities, thereby helping them scale sustainability improvements.

NimkarTek is a SAC approved Higg FEM Trainer Body

Features

Training Time: 4 hours

Training Language: English
